the course of routine investigation and analysis of laterite samples from parts of Dhenkanal, Cuttack and Keonjhar districts of Orissa.

(c) and (d) Ten laterite samples have been tested by the National Physical Laboratory. Platinum values reported range between 200 to 520 parts per million (PPM) whereas analysis results of GSI indicate platinum values of less than 10 parts per billion (PPB). As the platinum values determined, varied widely the Orissa State Deptt. of Mining and Geology has decided to get samples analysed in 2 or 3 reputed laboratories to confirm the incidence of Platinum.
